This directory, developed by the Loddon Mallee Integrated Cancer Service (LMICS) provides descriptions and details of a wide range of supportive care services available for people affected by cancer who live in the Loddon Mallee region.

People affected by cancer include the person who has the cancer, as well as family and friends who accompany their loved ones during their cancer journey. People affected by cancer need supportive care as well as medical treatment. Cancer can interrupt the normal flow of life. Hospitals and community-based organisations offer many services to help people affected by cancer to manage in these areas.
